

# Alcohol-free NASONEX® delivers powerful efficacy with more patient benefits

Nasal discharge

Itchy, watery eyes

**congested**

Nasal itching

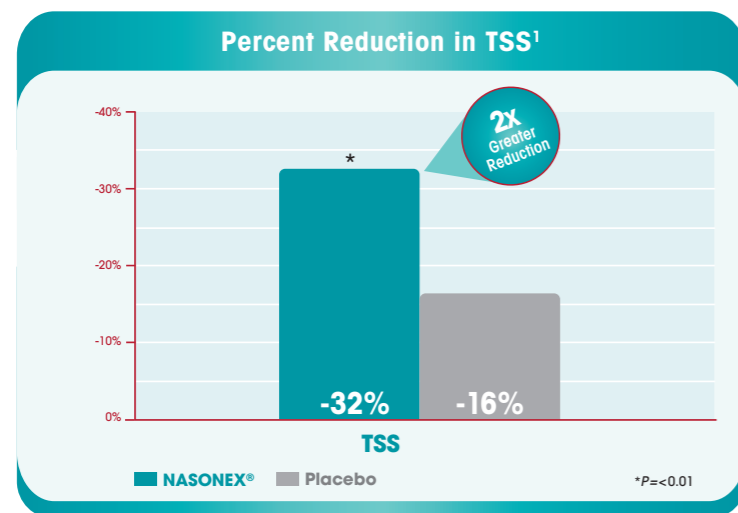

Dry, irritated nose

**Nasonex**<sup>®</sup>  
(mometasone furoate aqueous nasal spray)

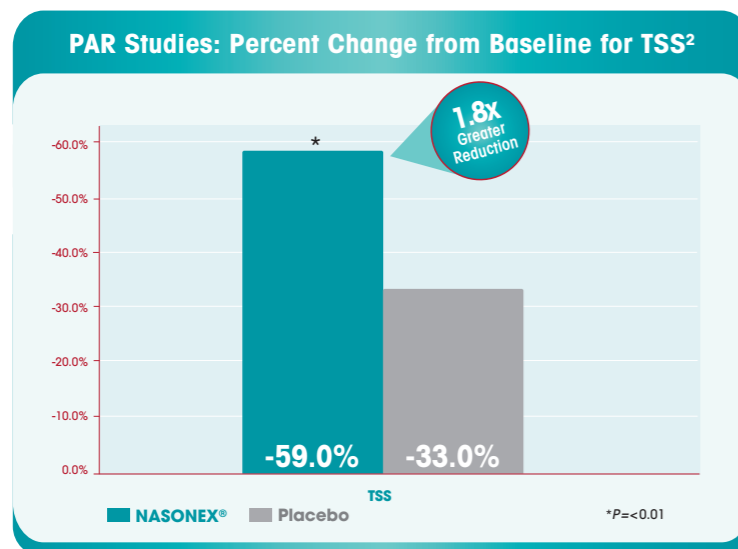

# NASONEX® delivers powerful control for a full range of allergic rhinitis symptoms

## Powerful relief in both seasonal allergic rhinitis (SAR)

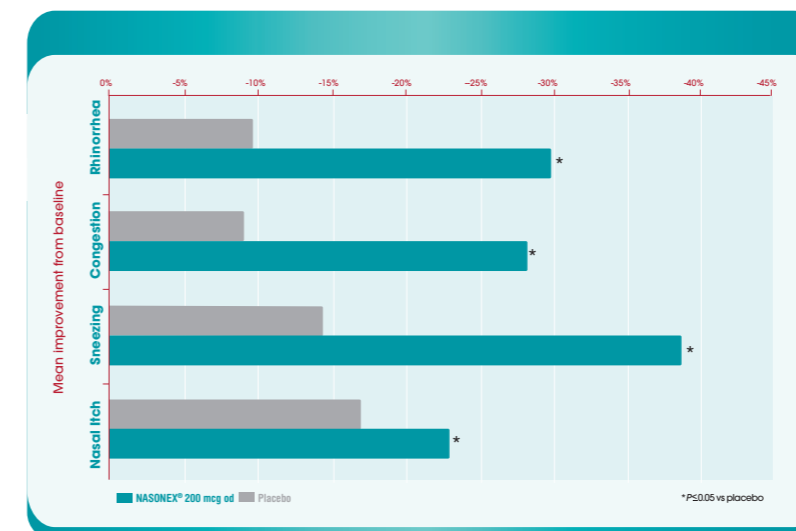

Total symptom score (TSS) mean ± SD reductions from baseline during 15-day treatment period: pooled data from patient diaries. Mometasone n=166, placebo n=165.

## ...and perennial allergic rhinitis (PAR)

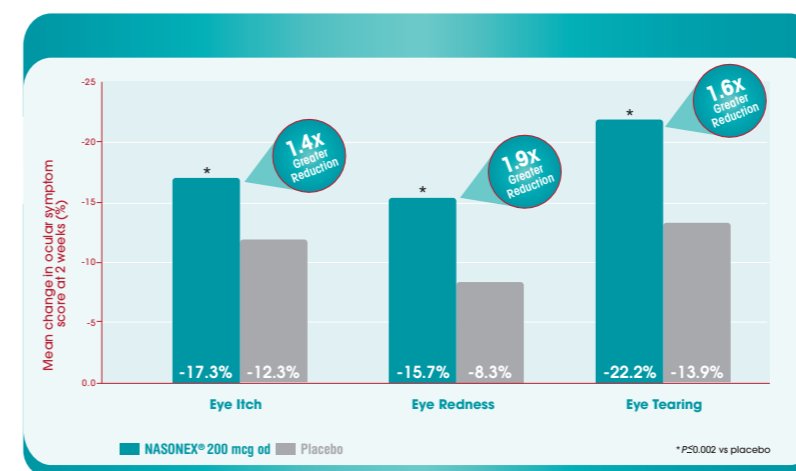

Primary efficacy endpoint. Randomized, multicenter, parallel-group, double-blind, double-dummy, active- and placebo-controlled study of 550 patients (ages 12–77 years) with perennial allergic rhinitis. Patients were treated for 12 weeks with either mometasone furoate 200 mcg (2 sprays per nostril), once daily, active comparator, or placebo.

## Powerful relief of all nasal symptoms including congestion, rhinorrhea, sneezing and nasal itch¹...

Multicenter, randomized, double-blind, parallel-group, placebo-controlled clinical study of mometasone 200 mcg (n=176) vs placebo (n=176) in the treatment of seasonal allergic rhinitis for 15 days.

## ...plus proven relief of all ocular symptoms related to congestion including eye itch, redness and tearing³

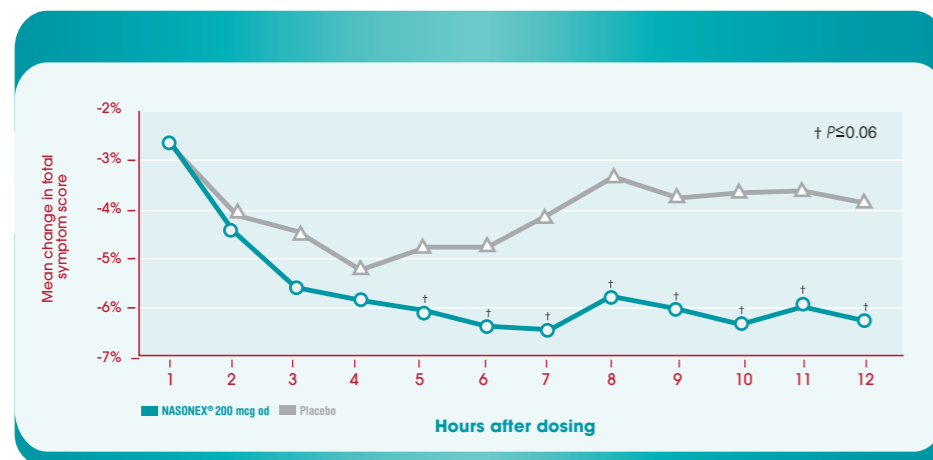

TSS was rated on a 0-9 scale and individual ocular symptoms on a 0-3 scale.

**Nasonex®**  
(mometasone furoate aqueous nasal spray)

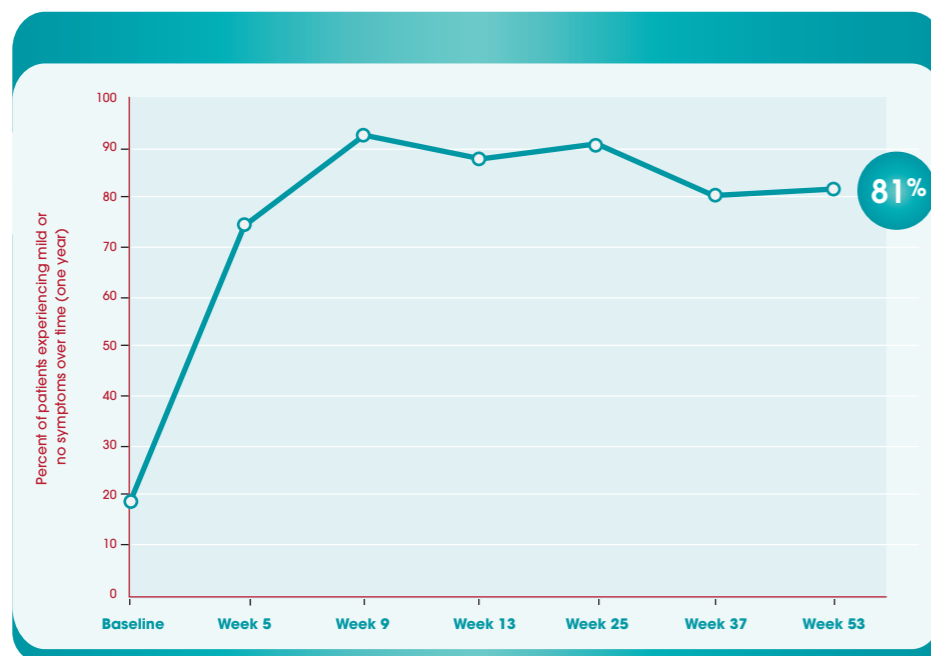

# NASONEX® delivers fast, lasting relief with more patient benefits

## Powerful relief both rapid... in 5 hours<sup>4</sup>

A single-center, placebo-controlled, double-blind, randomized, parallel-group study in 239 patients with SAR. Patients were randomized 1:1 to receive either NASONEX® 200 mcg or placebo as a single-dose administration. Outcome measure included as assessment of overall therapeutic response and change from baseline in total nasal plus non-nasal sign/symptom severity score, and total non-nasal sign/symptom severity score.

## and sustained... proven effective up to an entire year<sup>5</sup>

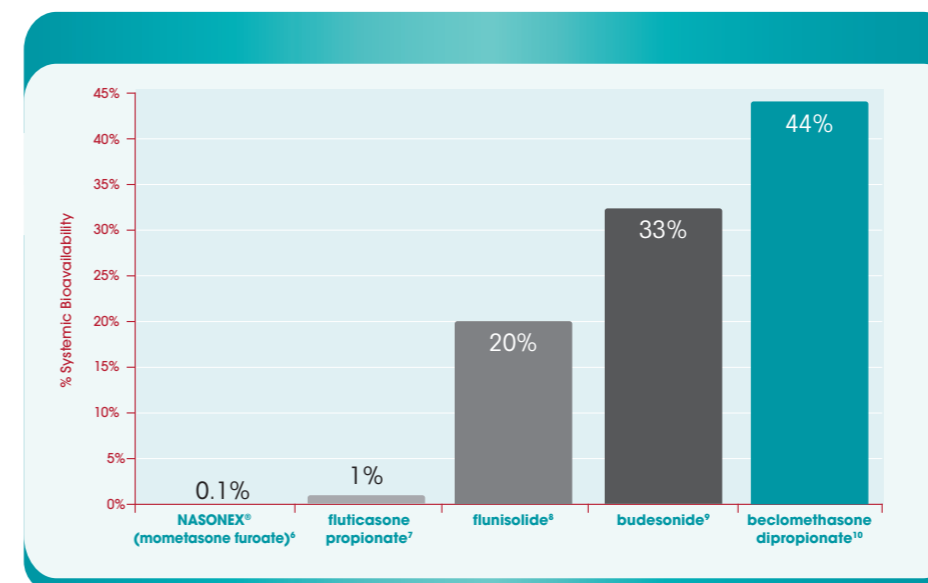

Randomized, open-label, parallel-group, long-term nasal biopsy study: MFNS 200 mcg QD (n=100) vs active comparator (n=98) for 12 months in patients with PAR.

## More patient benefits

- Alcohol-free formulation is less irritating, less drying
- Contains glycerin for moisturizing and soothing

## Targeted relief without systemic effects

- **Negligible systemic bioavailability** – (0.1% in adults) the lowest among all nasal-inhaled steroids<sup>6-10</sup>
- **No growth retardation or growth suppression** after one-year use in children<sup>6</sup>
- No evidence of hypothalamic-pituitary-adrenocortical (HPA) axis suppression **even at 20 times the normal dose** after one-year use in adults<sup>6</sup>

**Nasonex**<sup>®</sup>  
(mometasone furoate aqueous nasal spray)

# Prescribing Information

# Prescribing Information

# NASONEX<sup>®</sup> delivers powerful relief of congestion and more

- ✓ Powerful relief in **both seasonal allergic rhinitis (SAR) and perennial allergic rhinitis (PAR)**
- ✓ Powerful relief of **congestion, rhinorrhea, sneezing, and nasal itch**
- ✓ Proven relief of **ocular symptoms** related to congestion
- ✓ **Rapid** relief – as fast as 5 hours
- ✓ **Sustained** relief – for up to an entire year
- ✓ **Alcohol-free** for more patient benefits
  - less irritating, less drying
  - contains glycerin that is moisturizing and soothing
- ✓ Targeted relief **without systemic effects**
